

# TUNING YOUR GUITAR

If you already have your own electric tuner, great! Just clip it on to the top end of your guitar and turn it on. Play a string and tighten or loosen the string until the dial on the screen stays in the middle. Do this for all six strings.

Remember the notes of the strings, from low to high:

**E A D G B E**

(Eddie Ate Dynamite, Good Bye Eddie)

If you don't have a real guitar tuner, it's not a problem at all. You can install the free app 'GuitarTuna' for smartphones or tablets which is very easy to use, or you can try tuning your guitar by ear using this YouTube video:

Don't worry about it being perfect, we can help you in the lesson if you need it.

Have fun!
